

1. Use javascript and JQuery to do the following

display following form . As soon as text box gets the focus background of the text box should change to yellow. After user clicks on submit button validate whether username starts with “An” if yes display alert message “name starts with An” and change form background to cyan

The image shows a form titled "Employee registration form" enclosed in a black border. Inside the border, the title is centered at the top. Below the title, there are three labels: "Name :", "Email :", and "Salary :", each followed by a rectangular text input box. At the bottom of the form, there are two buttons: "Submit" and "Cancel", each enclosed in its own rectangular border.

2. Design a form to display image and 2 radio buttons (Button1, Buton2) and a button “show”. If user clicks on the show button then text on the button should toggle to hide and show accordingly. And image should appear if button is show and should be hidden if the button is hide.

After clicking on button also display alert box to show which radio button is selected.

3. Do the following using javascript and jQuery

Display a form to accept reservation details from user

Name, date , no of seats and a button Book tickets

Once user clicks on the button and if no of seats are 3 then 3 text box and submit button should appear below the form. accept names of members and user clicks on submit button display all information in alert box.
